NETWORK OF AIR MAIL LINES FOR NATION IS NEAR

Department Issues Rules for Private Bids on Carrving Contracts

BOSTON AND NEW YORK ROUTE BEING STUDIED

Next Moves in Extension of Service Depend on Show of Probable Support

Special from Monitor Bureau WASHINGTON, April 13-The long awaited regulations governing the letting of contracts to transport mail by air, carrying out recent legislation in which the Postmaster-General is authorized to contract for air mail service, were published today with a result that in a few months a net work of air lines is likely to spread out from the parent basis of the New operation.

Col. Paul Henderson, Assistant Postmaster-General, in charge of air mail, definitely told the correspondent of The Christian Science Monitor this morning that he believes the Boston-New York air mail extension would be a paying proposition and that after survey of the conditions there he sees no financial reason why the line should not be estab-

HOME EQUIPMENT SURVEY PLANNED BY WOMEN'S CLUBS

Mrs. John D. Sherman Would Make Federation Project Forerunner of Study by Government With Inclusion of Labor-Saving Devices in Next Census

A survey of labor-saving equip-ment in American homes is to be Government tells us that 92 per cent of the homemakers do their own Women's Clubs, Mrs. John D. Sher-man, president, told a representative of The Color of the homemakers are the saverage home is as efficient as it of The Christian Science Monitor this ought to be. With such facts to work the Massachusetts State Federation remedying conditions. The woman of Women's Clubs at a luncheon in ought to be saved from drudgery in her honor at the Hotel Vendome. the business of housekeeping in the Massachusetts State Federation. vital work of home-making."

It is hoped that this project may be the forerunner of a complete survey by the federal Government. The plan to include home equipment in the next census has been approved by President Coolidge. At her apart-ment af the Women's Republican Club of Massachusetts this morning, Mrs. Sherman spoke at length of the reasons for taking the census.

"The federal census shows exactly how many tractors, plows, cultivators and similar machinery are in use by farmers to aid them in carrying on the business of farming, but it never mentions whether the woman who keeps the house on the farm has a washing machine or running water in the kitchen. The Government has ever seen fit to take stock of the homes of the country.

Survey of Homes

"We will not carry on a house-tohouse canviss for our information, ligion. but we will get in touch with sources of information, state and city departments, business houses, etc., which will give us the needed facts, we will find out how many houses in a community are connected with awe modern heating plants, gas or electricity for light or heat, and ordinary labor-saving devices.

Lack of regard for law to be found among the young people of today, Mrs. Sherman held due to lack of proper respect for law in the homes. "You cannot expect young people to honor the law, if they see their partents will, seemed somehow not satisfactory, and second thought to an unusual act. It was decided that rather than wait for her friends to enjoy her gifts, she would make the gifts now and share in their enjoyment. The will was brought forth and to respect and obey the laws.

"We will find out to what extent the will, seemed somehow not satisfactory, and second thought that rather than wait for her friends to enjoy her gifts, she would make the gifts now and share in their enjoyment. The will was brought forth and to regard for law to be found among the young people of today, Mrs. Sherman held due to lack of proper respect for law in the homes.

But the mere fact of their being and in the will, seemed somehow not satisfactory, and second thought daded in the will, seemed somehow added in the will, seemed somehow and saccided that rather than wait for her friends to enjoy her gifts, she would make the gifts now and share in their enjoyment.

The will was brought forth and boston. He had gone all over the Plan Program at Washington

CITY WIDENS COURT STREET

Northern Gateway Unit Through West End to Expedite Traffic

The Court Street section of the historic West End running from Scollay Square to Bowdoin Square and beyoud is undergoing another change, perhaps the most abrupt of all the transformations that have befallen 12

in the course of the city's growth. Building of a broad highway, known as the northern gateway, a part of a comprehensive development plan whereby traffic from the north will enter at the Charles River and swing in a great semi-circle down through Cross Street, east around the center of the business district and out to the south at Albany Street, has caused great slices to be taken from the old lines of Court Street through Scollay and Bowdoin Squares and in the path of the advancing boulevard are falling from view old scenes. One would hardly recognize this locality today.

Once Fashion Center

As one stands at the northernmost nd of Scolly Square and sees what is happening to the narrow, winding Court and Sudbury streets—streets so typical of the old Boston-he seems to be in place totally unfamiliar. The square at the intersection of Hanover, Howard, Court and Sudury streets is no longer a narrow strip. It is rapidly becoming a broad, open highway as the great street en-

gineering project goes forward.
So, too, in old Bowdoin Square are great changes in progress. Before business had taken possession of it. in S.P.C.A. State Campaing Bowdoin Square took rank as an aristocratic quarter. Where the Revere House stood were the grounds and residence of J. Kirk Boott, a leading merchant of his time. The corner opposite the old Revere House used to be the estate of Lieutenant-Governor Armstrong. The two oldfashioned but stately stone houses between the head of Cambridge and Green streets were built by Samuel Parkman, father of Dr. George Park-

On the site of the Bowdoin Square church was the mansion house of Theodore Lyman, and near it the estate of Joseph Coolidge. The square, in the days of its glory, was adorned with beautiful shade trees and must have been an attractive spot. Later it became a street-car center, especially for Cambridge cars.

Old Street Lines

Along Cambridge Street toward the Charles River at the junction of Samuel H. Cross, chief of the Euro- Blossom, North Anderson and North bean division of the United States Grove streets the old street line has to the schools directly, and although Bureau of Foreign and Domestic been swept away and is now indi-Commerce, will be in Boston Wednes- cated only by remaining posts and education and of animal industry said day. IN THE FAR EAST SHOP

A Pair of Ming Fish Pools

from the Imperial Palace at Pekin

When Sir Francis Bacon wrote his suggestions for "the royal ordering of gardens" and for those "which are indeed princelike," he could have had in mind nothing of greater beauty for their embellishment than the two Ming fish pools of sculptured marble which the Wanamaker representative was so fortunate as to find in China last summer, and which have only recently arrived in this

For Fountains or Flower Urns

It is possible that the pedestals may be of slightly later date than the basins themselves, but the two parts fit together with such complete harmony of design that there is no slightest feeling of discrepancy. Their beauty, intricately wrought and expressed in frieze superimposed upon frieze-in the curling volutes of breaking waves, the intertwining, undulant curves of flames and dragons modeled in low relief, and the delicately incised running pattern of flower motifs and foliations-is of a sort to reward long hours of enchanted contemplation.

What ravishing fountains these basins would make, is the idea that instantly occurs to one. Or what wholly delightful flower urns-as The Far East Shop itself suggests by filling one with white, primrose yellow and carmine glass tulips, to crest with their gaiety of color the soft time-weathered grays of the patterned marble.

Crime News Suppression Tendency on the Increase and that newspapers purged of crime news are fit for children to read.

School of Journalism Sounds Out Public Opinion With Questionnaire—Dean Gives Views

clared Eric W. Allen, dean of the that students in the reporting class School of Journalism of the University of Oregon, in an interview today.

A questionnaire of 17 sections dealwith the way in which crime news is handled by newspapers has been prepared and submitted to newspaper readers by the school of journalism.. The principle question

or a paper which gives crime news The Monitor was referred to as a standard in making out the questions by Dean Allen and by George Turnoull, Professor of Journalism, who

which ignores crime news,

assisted him. "Crime news is not of social importance," Dean Allen said, "A large amount of space devoted to it is not cially advantageous. Such news makes a depressing newspaper and it gives a distorted view of a rather well advanced civilization. News of crime is monotonous, for the events chronicled have been happening for thousands of years.

Praise for the Monitor

'The Christian Science Monitor is a much better influence in the world than newspapers prominently dis-playing crime news," continued Dean Allen, "and although I do not agree exactly with the rigid stand taken by the Monitor, my sympathies are entirely in that direction Newspapers should print only enough crime news so that the world will realize that it has this problem on its hands. Not enough sordid details should be published so that thoughts of a normal person are colored and we should not be made to feel that we live in a world of criminals."

The Christian Science Monitor is

a most admirable newspaper and deservedly is gaining in popularity with 'All persons interested in clear progressive journalism want to see the fonitor thrive, and want to see the newspaper test out its theories over

a period of years," he continued.

Students in the school of journalism here are familiar with the Monitor, and read it with interest. It is one of the few newspapers outside of

LEAGUE OF NATIONS TOPIC AT FORD HALL

Dr. Hudson and Mr. Gibbons Debate Issue

Entry of the United States into the League of Nations was argued by two leading students of international politics, Prof. Manley O. Hudson of the Harvard Law School, and Herbert Adams Gibbons, author and newspaper correspondent, at the Ford Hall forum last night, the former urging America's participation that its influence for peace may be made more effective, the latter contending that the League has not ful-

alled its promises. "If you believe in any kind of in-ternational organization, can you suggest a substitute for the League! Hudson asked. League the United States will have its influence, and let us hope that it will be a good influence. But would it not be better to sit down in confer ence with the peoples of the world? And how could that better be done our international policy would be a more intelligent one, and we should have greater influence in the main-

of peace." Mr. Gibbons asserted that since 1919 one crisis after another has arisen threatening to upset the equibibrium the world, and some of their sources have been in the treaties of

peace. He added: These sources could reasonably e supposed to be subjects that could be taken up and discussed by the League. Yet, as we review the history of Europe and of the world since 1919 we shall see that in the great crises that have arisen, the League has been a negligible quantity, and that, therefore, its position in the world today must be judged by its lack of performance.

"You cannot expect such a league is going to make for peace in Europe or much les for peace in the hole world. How can we expect the United States to regard the Leag. e. with its broken promises and lack of fulfillment, as the best agent to con-

ribute to world peace?" The meeting last night closed the series of the Ford Hall forum addresses.

Indicates More Than 300 Active Commissions

City planning programs were dopted by fully 100 cities more in 1924 than in the preceding year, there now being more than 300 established city planning and zoning commissions in the United States, according to the 1924 survey completed by Mrs. Theodora Kimball Hubbard, honorary librarian of the American City Planning Institute.

Mrs. Hubbard, who was formerly librarian of the Harvard School o Landscape Architecture, where she collected data on this subject from all parts of the world, is one of the few persons to make such a nationwide survey and is a distinguished authority in this field.

Rapid Progress Made In 22 states city planning has been carried on, it was pointed out, with the result that city-planning information has been obtained and correlated from about 350 cities and towns. Indication of the rapid progress which the movement is making are the following conclusions which than by taking our part in the are the following conclusions which League of Nations? In the long run Mrs. Hubbard has drawn from the

statistics received: Because planning is already successful in many communities, others are emboldened to undertake it. Groups and interests formerly un-convinced or antagonistic are often turning into leaders. The realtors or the country are backing the movement more strongly than ever. The city planning division of the Ameri-can Society of Civil Engineers has been conducting an instructive series of meetings. Programs of the National and State Municipal league, the Chamber of Commerce of the United States, the National Automo-bile Chamber of Commerce, have all included city planning as an estab lished municipal responsibility. In addition to the splendid work for zoning carried on by Secretary Hoover through the division of build-

ing and housing, he was responsible for calling the National Conference on Street and Highway Safety and appointing a City Planning Committee as one of its eight subdivisions. The extension of city planning in the United States has been so phenomenal that it has attracted the at-tention of other countries, and the holding of the International Town Planning Congress in New York City this month is looked upon as official foreign recognition of the American achievement in these lines.

Street Traffic Problem

Majestic Theater-"Betty Lee," a problem has received a large share equally outstanding.

> Commerce show that more than 60 municipalities adopted zoning ordin- to 20,000 tons. ances in 1924, bringing the total to 320. Among important cities zoned last year are Boston, Cambridge, Albany, Utica, Wilmington, Del., Columbia, S. C., Cincinnati, Minneapolis, Kansas City, Omaha (revised ordinance), Bismarck, N. D., and Portland, Ore.

The quest on of the municipal concareful consideration by several cities and the subject is being studied by experts. Milwaukee con-"Betty Lee" danced and laughed its tinues to make substantial progress Herrick, Oliver W. Low, Sidney F convictions, and from time to time brought new music to the attention of the public. 14 U. S. FLEET SHIPS TO BE "DIESELIZED"

Test Held to Prove Engine's Operating Superiority

Special from Monitor Bureau WASHINGTON, April 13 - The United States Shipping Board has approved the selection by the Fleet Corporation of 14 cargo vessels for all of their college expenses. She has conversion into oil-burning vessels found that one out of 12 girls thus of the Diesel type. This is the first action by the Shipping Board to "Dieselize" any of its own vessels, although a number of boats have Miss Jeannette Studley, a graduate been sold by the board to private purchasers agreed to install Diesel engines.

The success of the engine has been proved to the Shipping Board by the record of the only one of its vessels operating under this type of propulsion. This is Penn, a cargo vessel of 12,358 dead weight tons, now being operated by the American Pioneer Line. It was built originally with a Liesel engine, The Shipping Board reports that the that it would be possible for it to make its usual trip of about 27,000 miles without refueling, although this has not been done.

Fuel oil can be stored in parts of a vessel where nothing else would go. Thus the use of this type of engine effects a saving of valuable space formerly occupied by coal Cleanliness by the practical elimi-

One of the state income tax law as recently requested by the legislature.

The State is collecting about \$400.

One of the state income tax law as recently requested by the legislatur of the Massachusetts Bar Association, announces that an effort will be made in the Massachusetts Legislature next year, to pass laws requiring the Executive Council to specify this information in its election re-port. The same bill that was lost in the committee this year will be remitted, he said.

With numerous issues of popular interest due to come before the people in 1926, including the referendum on the professional Sunday baseball measure, sponsors of the Grinnell bill believe that it will enable the public to obtain a clearer understanding of the vote if the entire ballot is analyzed in the executive re-

Acting as Individual

Mr. Grinnell said that in presenting the "blank-ballot" bill before the Joint Legislative Committee on Election Laws that he was doing so as an individual and not as the secretary of the Massachusetts Bar Association for those measures he has frequently argued before legislative committees at the State House.

In tabulating the votes cast on he various amendments submitted y the Constitutional Convention in by the Constitutional Convention in 1918, the executive council specifically tabulated the blanks so that anyone reading the report could see at a glance how many blank ballots there were in each town and city for comparison with the "yes" and "no" votes instead of going through the process of adding and subtracting necessary to work out the number of blanks for himself.

I believe that it is a matter of special importance for the information

cial importance for the information of the public that the blank ballots cast on all questions on the ballot should be carefully tabulated and the results of the popular vote made as easy for the people to understand

Unofficial Reports Printed

Under the earlier practice when ot only the blank ballots were not tabulated, but the total vote was not stated, I printed in "The Massachu setts Law Quarterly, for the infor mation of those interested, unofficial reports of the blank ballots for the purpose of comparison, but these unofficial reports, of course, were

unofficial reports, of course, were liable to be mistaken in some respects and were less satisfactory than the official reports by the Governor and Council.

Since the printing of the blanks cast on the constitutional amendments to which I have already referred I supposed that it had become the established practice to tabulate the blank ballots in regard to all such questions for the into all such questions for the in-formation of the public. As I have explained, I believe that this should be an established practice.

CLASS IS ARRANGED FOR STUDY OF TREES

The Legislature has bills before thorus conducted in Kansas City by it pertaining to the income tax law, John R. Jones. Later she sang in a SALEM, Mass., April 13 (Special) A class in tree study, under the one of which provides that the money auspices of the Essex County Nature will be retained in the state treasury, sued the study of music along with auspices of the Essex County Nature will be retained in the state treasury, Club, has been tentatively arranged instead of being returned to the cities her regular course.

Marion seemed to be devoted to reand will hold its first meeting on and towns. Saturday, April 18, at the Peabody Museum. Fred A. Smith of the MAINE METHODISTS Essex County Agricultural School will conduct the course.

It is expected that six lessons will be given on consecutive Saturdays, the work to consist largely of field trips. The subjects to be taken up ference opens its session in Augusta will include: "What Is a Tree?"
"Winter Identification," "Summer on April 21, Bishop Thomas Nichol-Identification." "Leaf and Flower of the Detroit area will preside for the first time over a New Eng-Growth," "Fruit and Seed Studies.

The porter of the shoemaker's daughter, these were this models. And certainly Mr.

The porter of the shoemaker's daughter, these were the shoemaker's da society's exhibitors has steadily increased. It has reached this year the figure of 1891. The 131 rooms are filled with 3508 works—practically all canvases, since the sculptors are

Never has a salon imposed such a tiresome job on the art critic. When one has walked through these two miles of paintings one is not in-clined to indulgence. The first imclined to indulgence. The first im-pression is one of sadness. To cubes and includes portraits, figure studies, cured. The figures are undoubtedly pression is one of sadness. To cubes and includes portraits, figure studies, cured. The figures are undoubtedly and triangles, decidedly abolished, landscapes and genres. The majority types, but excellent Spanish types. ingenuousness. Walls have been covered with sketches of muddy color; the most gracious sites appear to have been ravaged by a deluge, and laborious audacities make one regret the past follies. It all wears a uniform of misery. It bores and fatigues.

If the most original of artists have revealed themselves at the Indépendants, it is averred that most of them quit the salon when they have attained notoriety. A few remain faithful, but they have nothing new to say. The truth is that the Salon des Indépendants, for those artists who can be sure of a future, has lost its raison d'etre. It must not be for gotten that the Indépendants is the Salon des Refusés in which appeared Manet. Then there was only one salon. But today rival societies abound and any artist worthy of the name could find a way of producing his works in the scores and scores of galleries which hold exhibitions from one end of the year to the

What is wanted from a salon of 'jeunes" like the Indépendants is the revelation of new temperaments. To paint well is not sufficient. We look for original gifts, for the expression of some unexpected aspect of our daily life. What has been said about odern life? What inspiration have the painters drawn from aviation, from motoring, and from the factories with their machines and their workers? All that has hardly been touched. And yet they call them-selves modern. Like their elders they tell us of spring, of sunsets, but with much less skill and much less sentiment. Their modernity shows in their ignorance of draftsmanship and in their unnatural use of colors.

There are a few outstanding pictures. "Le Port," in which Yvex Alix makes the best of his qualities of strength and solidity; two lyrical figures of Kisling, almost pleasing in color; "La Guerre," by the austere Gromaire; two small canvases in harmonious tones, by a newcomer, Grach; an "Arlequin" by Serge are among the most notable exhibits at the Salon. Utrillo has as usual sent some samples of his post-card like talent. Raymond Duncan has renewed his customary impertinence renewed his customary impertinence by sending something so little understandable that I am afraid he courtesy of the Casson Gallery, Boston (Courtesy of the Casson (Courtesy of the Suddent are not the students are to be found in the midst of their about the white fella (Courtesy of the Courtesy of the Casson (Courtesy of the Cas Gromaire: two small canvases in

The Strange Art of

VIENNA, March 13 (Special Correspondence) — The Künstlerhaus is surrendering for the succeeding month its lower floors to the paintings of Albin Egger-Lienz, and the rooms of the upper floor to the sketches and plans of the architect Clemens Holzmeister.

Albin Egger-Lienz merits attention because of his blunt honesty

and the weight of mass feeling for composition. He cares little whether his pictures are admired or not. He is a son of the Tyrol, where mountains rise from the valleys forming powerful proportions and where the woodcarvers make their peasants atrong and square. The line appealed to Egger-Lienz and the color was forgotten, almost entirely obliterated by his line and rough simplicity.

Brueghel and Rembrandt of the

Dutch school are mentioned as having influenced Egger-Lienz, but it would seem as it the atmosphere of early Egyptian painting was equally present. The former, the Dutch, are recalled by the unrelieved use of browns, reds, yellows, blacks, and an occasional blue note.

Indicative of the style of Egger-Lienz is the fact that in six out of the seven larger paintings hung in the central hall there was the repetition of five figures: five men and five women, or a family of five, or five men alone. The five giant fig-ures, increased in size by their rude simplicity of outline and single color tone, were arranged in one design and then in another, and another. Those without Names," was another characteristic painting. Soldiers were going "over the top," bent low, moving, heavily, ceaselessly forward, like separated waves of a dull sea following a storm.

Egger-Lienz was most at he among his own tillers of the soil. among the peasants of south Tyrol, landscapes. Beside this representa- Brown subjects of the soil. A picture painted in the last year is that of a peasant thrown full length on the ochre sands, drinking also devoted to modern religious art. from a pool. A contrast of tenderness and strength.

To pass for a moment to the plans of Holzmeister, it could be equally well remarked that he, in his way, is an early twentieth century master of his school. This architect, also from the ragged, rangey Tyrol, shows a splendid grasp of outline and of proportion. His plans; whether for oridge, apartment house or inn, show high technique and cultivated and pleasing imagination

Long River Trip Brings Adventurous Americans to the Tribal House at Taraqua

By W. DUVAL BROWN

walking about, but there was not a

soul on the shore to meet us nor was

up to the "malorca," the only edifice at Taraqua, to pay our respects to

the chief and to see what chance there was of getting another boat and

crew to take us on to the Colombian frontier, 10 days' journey farther up

Within the Tribal House

typical of such houses in this region

of the upper Amazon Basin, being a large palm-thatched house 70 by 80

feet with a pitch at the eaves of about five feet and at the ridgepole

The "malorca," or tribal house, was

TARAQUA can be found on the map, or some maps, but it should not be. Its improper existence on the maps is all due to the restless rovings of an explorer with theodolite and compass, and an unseemly desire to make definite all things upon the face of the earth. The wretches will soon destroy the "unknown" and leave no place upon "unknown" and leave no place upon which to rest one's nebulous dreams across the river we had seen people

which to rest one's nebulous dreams of pleasant things and places.

No, Taraqua is not an island, a pin dot in the mid-Pacific. It may be found in the upper Amazon region of Brazil. It is on the Uaupes or Walpes River, depending upon whether or not the speaker is an Aracitosa on a Comman of Comm American or a German.

Just at sundown our steamer swung from the muddy and turbu-lent waters of the Madeira River into those of the Amazon dark and silent. We had come upon the mighty king of rivers from the land side traveling down from the Bolivian highlands. Early the next morning our ship anchored off Manaos, that inland port and modern cfty in the midst of many thousand square miles of trop-ical forest and jungle.

Lacy Tropic Night

After several weeks in Manaos waiting for a boat we were finally off for Samia Isabella, the first lap of our journey, 400 miles up the Rio Negro. It was past midnight when the Inca swung her snub nose out into the black, silent and swift running waters of the Negro. I roused up only for a few moments to watch the receding lights of Manaos and to wonder how any one could navigate a ship through such blackness. Black in the heavens above and the waters in the heavens above and the waters underneath as, a soft tropical darkness, though, that enveloped like a mantle, a lacy soft mantilla, not the

mantle, a lacy soft manchiz, not the hard alpace blackness of the north.

The good ship Inca was well built though not for speed. But then one never worries about speed on the equator, where there is no hurry, and life is pleasant if not always exciting. The Inca seemed comfortable enough foating palace coming down after several weeks in the bush. The staterecens were large enough, but no one slept in them except the "gringo" who could not appreciate the comfort of a good Brazilian hammock. All the sengers and crew hung their ham-

Brazilian River Etiquette

The Inca, like all good ships, had ber set forms of what was and wasn't done. It was quite all right to go to the first meal of the day, at 7 a. m., in pajamas and slippers with-out socks. The Amazonian seems to have a strong antipathy to socks and only wears them when it is unavoidable. Notwithstanding the fact that there were ladies aboard, pajamas and said sockless slippers were correct, even for the captain, until breakfast or the midday meal served at 11:30. This meal one must attend dressed and wearing a coat. A collar or even a shirt are not absolutely essential, though better form. Tea served at 2:30, coat "de riguer." Tea again at 9 p. m., informal, though not quite to pajamas. One of the anecdotes of to have a strong antipathy to socks and only wears them when it is un-aveidable. Notwithstanding the fact to pajamas. One of the anecdotes of the penetrating the river, told in Bolivia, tells of a dampness of the tropical nights. The wealthy traveler on a rather preten-tious river boat who came to the one layer of palm leaves so that the table without his tie. The next day the captain passed a tie down the long table to him. He accepted gracefully and put on the gift, but the next day at the table the Bolivian very impressively passed along a pair of socks to the captain. The captain's omission was not above board therefore not considered so

grave in Brazilian river etiquette. At Santa Isabella, after arranging to have most of our baggage go up went on ahead to San Gabriel Mision in a launch where we waited for the luggage to overtake us .. The last 30 miles before reaching San Gabriel was rapid water and it took the launch more than 15 hours to make this distance.

From "Baraca" to "Baraca"

Portuguese trader for Taraqua, beyond which point his Indian's would not take us. We were now traveling in a 20 foot boat propelled by eight graceful knot low on the neck, which is a 20 foot boat propelled by eight graceful knot low on the neck, which graceful knot low on the neck graceful knot l in a 20 foot boat propelled by eight and all control of the neck, which all day and row with long oars made by lashing the usual to a long pole, thus making an oar eight or nine feet long. BRITISH FARMER WILL NOT CONFER

Both Agricultural Union Decline Government Plan of Meeting

Special from Monitor Bureau LONDON, March 27-The muchdiscussed proposal of the Government to hold a conference of landowners, farmers, and farm workers for the purpose of deciding upon a permanent agricultural policy has now been abolished. This decision is the direct outcome of the refusal of both of the unions representing agricultural workers to accept the invitation to join the conference.

had been entertained that the Government would find a way over this difficulty by inviting unofficial workers' representatives to the conference, but it has subsequently tran-spired that, had the Minister of Agriculture adopted this course, the National Farmers' Union would have declined to send their delegates. In these circumstances, it became obvious that the Government had no alternative but to abandon the idea of the conference.

Fortunately, however, this decision does not mean that the Government will take no steps to restore prosperity to the countryside. On the contrary, there is plenty of evidence to show that the Cabinet is fully pansy hitched in between the shafts "Now then—" said Mr. Picker. And to show that the Cabinet is fully alive to the necessity of prompt action in the matter. In the first place, the Minister of Agriculture, Mr. Edward Wood, is to invite the various ssociations representing landowners, farmers, and farm workers respectively, to submit to him any ideas that they may have for the better ment of the industry.

These suggestions will be carefully

examined by the Ministry and, if agreement can be reached upon them Unfit Houses Demolished they will doubtless be embodied in the future agricultural policy of the Government. An invitation to submit proposals is also extended to "those interested in the land," but it is pointed out that the Ministry realize that any scheme of subsidies or pro

-Makes Starting and Hill Climbing Easy

Eventually

Vegalene will be manufactured in large enough quantities to ACTUALLY displace gasoline as a motor fuel in the territories where it is made by this patented process. The present concentrated form is its first introduction to an enthusiastic world of motorists.

Vegalene already has received the indorsement of scores of users. It comes to you guaranteed to keep your motor in a clean condition, free from harmful carbon deposits, and to give more power and better mileage—when properly used.

Perhaps you have found many carbon removers a failure when put to actual test. Not so with Vegalene. It does its work positively and with satisfaction.

Ask your dealer for a can-follow directions closelyyour motor will purr smoother than ever.

Lively Interest in Study of Latin and Greek Not Aided by Grammar is much more thoroughly—because intelligently—known. It no longer

THE time-honored method. of It was, and still is in many cases. No one, not even the most ardent grammar. Nor do they desire that the work of their pupils should be slipshod and inaccurate—an accusation too often brought against them. to What they desire is greater accuracy, not less, but they recognize that at the beginning of things is to pro- herent value of the study. duce a mechanical accuracy which

gets nowhere. The constant drill, the memorizing a multitude of strange forms before any real study of the language quaintance with the great authors can be allowed—has been responsible consciously learnt. Any intensive and all kinds of spices are found in study of it comes not first in the order the Moluccas. for the deadening of the classics Possibly one reason is that the study has begun too early before the pupil has any real knowledge of his own language. Anyhow grammar has become an end in itself, instead of a means to something much more im portant For it is true that almost anybody can learn grammatical forms by heart. Indeed my own experience as a teacher has been that the less talented the pupil the more easily he learnt his grammar. The intelligent pupil revolted against it. But when it became a question of applying the grammar, of using it as a key to unlock a treasure house the obtuse of course was utterly at a loss. He had crammed a combination of sounds without the least idea that it had any meaning or purpos

Called "The Husks" Nor, indeed, had it any meaning or purpose as he learnt it. It is appalling to think of the waste of time and the expense of intelligence that resulted. Routine lay upon us like a

The Era of Experiment in American

in the early years of the Elizabethan that of an apple ripened by country period in England, tireless attempts are being made by dozens of versifiers in the direction of something new. Mere novelty, however, is no guarantee of merit. Even some of our leading poets are guilty of ten fail-news to one success. And for the host love London, and yet he an artist in prose, like Lamb, may love London, and yet he an artist are received as a result of the novel are traceable in the direction of something duced by resistance to a strictly urpayri have disclosed. Of the great masses of papyri already discovered, only two or three per cent are literative for the novel are part they are simply repeating the But he must be a strong individualattempts, the gropings, of former into a subway daily. One of the most attempt to write with the unstudied distinctive things about Shakespeare flow of conversation and to avoid is that he was essentially a country short of amazing. The personal let-"poetic" diction and inversions. With product using London merely as a ters give us quaint glimpses of family Whitman, they indulge in too un-restrained a worship of democracy. Stratford the immense gusto with little boy of Oxyrhynchus wrote thus At least a dozen of them have written which he depicts country ways and little boy of Oxyrhynchus wrote thus poem on Lincoln; but only one, the balm of the forests is characteristic of the man. preted the blending of simplicity with When, out of the phase of experiin magical form, and it is The Congo," Mr. Lindsay beats the has said, tom-tom with gusto and with success; and in this and several other poems he reveals a saving humor which augurs well for his future.

I am inclined to think, too, that both he and Robert Frost see farther than most of their contemporaries in refusing to adopt free verse as a medium of expression. They have perceived that its deceptive appearof ease covers a difficulty that only flawless poetic taste can triumph over. And, as Wordsworth discovered, unchartered freedom tires. stars are restrained in their courses, and a kind of regular meter governs the universe. Where Whit-man is most successful in free verse, he approaches regularity of rhythm. Yet the wind of experiment and discussion in this district has cleared the air. It has brushed aside the tendency to unwise traditionalism has acted as a useful servant, occupying the first scene until a appeared, it is because the time is quite ready for him. I suspect that he is being held back by the somewhat prosaic atmosphere of mechanisms—of telephones and dios, automobiles and movies, airplanes and tractors. Imagination is living. The novel manages to get on tolerably well, but poetry needs more fostering; it needs a somewhat

different spirit in our civilization.

What this spirit is to be one cannot attempt categorically to state; but it will be quite different from that which looks for comfort and delight through mechanical inventions. That blissful era demanded by one of our labor agitators, in which ery manual worker shall own a Ford. will not be equivalent to the mil-lennium. When every American ear is glued to a radio, hearing often the commonplaces of some singer, lec-

Revolts and resentments purpose of procedure. H. T. B. purpose of procedure.

Resurgam

Spring has cast its ribbon band, Out once more upon the breezes; Well-known fragrancy increases, And with promise fills the land. Dreamy violets are Resurrection nearing. Hark, a harp's soft tone afar! Spring, it is thyself! Thee I hear preparing. -Eduard Mörike-Translated from the German by E. M. Cordsen.

The Greek Papyri

ould only recover letters that ordi- with New Testament times, they would be pression.-Edgar of the greatest possible assistance to "The Making of the English New Testament." us in understanding the language of the New Testament. There did not seem to be the least prospect of the realization of this wish when he expressed it; indeed, the very suggestion may then have seemed a gratuitous bit of fancy. But the papyrus discoveries of the past generation have abundantly proved that Bishop Lightfoot was right: and today cholarship finds something almost prophetic in his words. ...

The first discovery of Greek papyri O was not made in Egypt, but in Italy. In one of the ruined houses uncovered in the excavation of Herculaneum, near Naples, from 1752 on, was found the library of an Epicurean philosopher, which had been overwhelmed by the eruption of Vesuvius

Much was expected from the Herulanean rolls when the first publica- Our sails are never lost to sight; tion of them appeared. This expect ant attitude is finely expressed in They gleam, in winter wind-cloud some lines of Wordsworth:

O ye who patiently explore The wreck of Herculanean lore, What rapture, could ye seize some Theban fragment, or unroll One precious, tender-hearted scroll Of pure Simonides!

But the Herculanean finds were dis appointing. They consisted for the most part of Epicurean philosophical works of no great interest. The most delightful thing found among them was a copy of a letter from Epicurus to a child, written probably about 275 B. C. It ran thus

We have arrived in health at Lampsacus, myself and Pythocles and Hermarchus and Ctesippus, and there have found Themistas and the rest o the friends in health. It is good if you also are in health and your grandmother, and obey your grand- Off Monomoy we fight the gale, father and Matron in all things as you have done before. For be sure, the reason why I and all the rest love you so much is that you obey

them in all things. . . ."

Most literary papyri found turn out to be fragments of Homer—a fresh evidence of the great hold the Iliad and Odyssey had upon the ancient These have carried our knowledge of the Homeric text back a full thousand years. Of course many fragments of other Greek authors already familiar to western learning have come to light. Greater interest attaches to the lost works of Greek literature which the papyri have restored to us in whole or in part. New historical works have been found, and new poems of Alcman and

STOCKS SEEK HIGHER PRICE LEVEL TODAY

More Cheerful Sentiment Is Manifested-Motors a Feature

Stock prices forged slowly ahead as Stock prices forged slowly ahead as trading was resumed today, with a revived speculative interest shown in various motor, rubber and oil shares, as well as popular specialties.

American Can moved up 1%, and Mack Trucks and Maxwell "B" a point each. U. S. Steel improved fractionally.

Frading expanded in volume as the rrading expanded in votate to a more cheerful sentiment. Virtually all classes of stocks sought higher levels under the leadership of the pivotal inustrials, with numerous gains of 1 to points scattered throughout the list.

2 points scattered throughout the list.
Coca-Cola reached a new top price
for the year at 99 in anticipation of
larger earnings during the summer.
American Can extended its gain to
2% points, and Maxwell "B" to 2.
Baldwin, U. S. Steel, Montgomery
Ward, Mack Trucks and Hudson
Motors were among the favored issues
to sell a point or more higher.
Foreign exchange trading was dull,
sterling opening unchanged at \$4.77%.

Some Irregularity Contrasting movements marked dealings in oils and motors. Most of the automotive issues were buoyant, Nash Motors mounting 7 points to 357. Maxwell B 3½ points to 67½, and Hudson 2½ points to 47½, all record high figures. Maxwell A. however, yielded a point on profit-taking.

Oil stocks worked lower, with Markend and Par American B showing

and and Pan American B showing conspicuous heaviness.

Pressure drove Chicago & Northwestern down 1% points to a new low

level for the year at 48%.
Constructive operations went ahead
in the main body of stocks. American
Can sold almost 4 points higher, and us Players, American Ice, American Linseed preferred and American Agricultural Chemical preferred moved up about 2 points each.

Call money renewed at 4 per cent. Repurchases of stocks sold for the Repurchases of stocks sould follow the short account contributed to the rapid advance of various issues in the early afternoon. United States Steel went for 115 % and American Can to 170 ½. Textile and mail order shares were wanted, American Woolen gaining 2 points, while Montgomery Ward oils mounted higher, including Mexican Seaboard.

Considerable irregularity developed in today's bond trading. With no im-mediate solution of France's ministe-

announcements as they did to others the character and volume of the trading would have been quite different. For instance, if they had acted upon the ideas expressed, and actual state-ments made by E. H. Gary, chairman of the United States Steel Corpora-tion; Charles M. Schwab, who holds tion; Charles M. Schwab, who holds the corresponding position with the Bethlehem Steel Corporation; E. G. Grace, its president, and E. P. Topping, head of the Republic Iron & Steel Company, undoubtedly they would have bought stocks freely, as they did up to a few weeks ago, and the market would have moved to a materially higher level. During recent days, however, there

has been more pessimism than opti-mism in speculative circles in this city. There has been little disposition to magnify favorable news. On the contrary, there has been a pronounced trary, there has been a pronounced tendency to minimize it, and the op-posite attitude has been maintained toward conditions and happenings that were not capable of an altogether fa-vorable construction.

Blg Steel Men Optimistic

All four of the steel authorities whose names have just been men-tioned, stressed the idea that actual business in the steel industry in March had been better than had been 25 Westingh'se. 68% 68% 68% 68% 68% 1000 Atl Gulf 58. 65½ 65½ 65½ 1000 HoodRub 78.103 103 103 103 5000 Miss Riv 58. 98½ 98½ 98½ 98% 12000 NE Tel reg.100 100 100 122 Quincy Min. 23 23 23 55 Recee Fold. 17½ 17½ 17½ 12 Swift Inter. 28½ 28½ 28½ 29 40 Torrington. 45½ 45½ 45½ 46¼ 147 US&FS pp. 29% 29 29 29 170 Uni Shoe. 42% 42% 42% 42% generally represented, and they all agreed that the outlook for the next few months was more encouraging than had been represented by many addition Schwab, with his characteristic opti-mism, broad vision and constructive ideas, predicted that the next 20 years would be the best that this country

The prospects of cheaper pig iron was another factor which kept the iron market dull. New low prices were made during the week, Buffulo iron dropping to \$20, base, and leastern Pennsylvania iron being weak at \$22.

LOS ANGELES, April 10 (Staff Correspondence)—Paul G. Hoffman, local Studebaker distributor, prominent in civic affairs as president of the Los Angeles Traffic Commission and closely identified with other public organizations, has been elected vice-president, director of sales and a member of the executive and financial committees of the Studebaker Corporation of America. He has taken a year's leave of absence from his loss Angeles business duties and with Mrs. Hoffman and their four children will reside at South Bend, Ind. He is the first dealer to be called directly into the vice-presidency and directorship of any similar organization in the country, with full control of all sales policies. Mr. Hoffman succeeds H. A. Biggs. for the last five years sales director of Studebaker, who retires. STUDEBAKER SALES DIRECTOR

TAKING THE "DICKER" OUT OF A SALE

There is often considerable difference between the asking price and the offer for commercial, industrial, or utility properties.

Reaching an agreement by "dickering" is poor business, and is consequently becoming obsolete.

Frequently the shrewder bargainer profits at the expense of the party who is ignorant of actual values. For instance, certain important tangible or intangible factors of value may be overlooked or overrated.

The only way of obtaining correct knowledge of the value of a property is by means of a complete, analytical appraisal of every factor in that value.

An American Appraisal furnishes this analysis.

Engaging an agency to fix the price at which one's possessions may be sold is one of the most important transactions into which one can enter.

Why use anything less than the best?

STEEL TRADE'S **NEW BUSINESS**

Incoming Orders at Rate of 60 Per Cent Capacity— Easier Price Trend

NEW YORK, April 13 (Special)—
The unfilled tonnage statement of the United States Steel Corporation bears out the observation that has already been made concerning the steel industry—that production and shipments that the same rate as in March, that month having been the best in 15 months. The outstanding demand is

output Still High

Another group of statistics which carry out the idea of high production were those pertaining to steel ingots in March, which proved to be the second highest in the history of the industry. The total was 4,180,333 tons, or 160,782 tons daily, as compared with 4,187,942 tons, or 161,075 tons daily for March, 1924. This was an annual rate of 50,000,000 tons yearly, whereas the practical capacity of the country is re-ever, there has been more activity for

ketwise was the announcement of a reduction of 50c a ton in Lake Superior iron ore for 1925, non-Bessemer grades. Bessemer ore was reduced from 61c to 71c a ton. About 85 percent of the ore consumed in the United pares with the monthly average since on monthly partial payment plans. The second of the ore consumed in the United pares with the monthly average since on monthly partial payment plans. The second of the ore consumed in the United pares with the monthly average since on monthly partial payment plans. States comes from the Lake Superior January, 1924, low of January, 1922 district. The reduction was a surprise.

A few months ago it was expected that ore would be advanced 80c a ton.

Index Pur. that ore would be advanced 80c a ton, or the amount of the decline of the previous year. However, in view of the depressed state of the pig iron market, higher prices were later regarded as out of the question.

The ore prices were determined on a purchase of a large tonnage by the Ford Mator Company Inasmuch as Jan. av.

The prospects of cheaper pig iron was another factor which kept the iron market dull. New low prices were made during the week, Buffalo iron dropping to \$20, base, and leastern Pennsylvania iron being weak at \$22. The volume of sales was a trifle better than the previous week, as some consumers concluded iron was a hargein and that perhaps the hot-

was low bidder. Considerable pressure is being brought to bear against fur-ther purchasing of the foreign pipe. American pipe makers and the trade union have issued formal protest. One American manufacturer pastes one American manufacturer pastes stickers on all letters to the effect that he will not use a pound of foreign iron or steel. It is intimated that the im-porter of French pipe will not solicit business actively henceforth because

of the bitterness which has been aroused.

Alt is estimated that 750,000 tons of Alt is estimated that 750,000 tons of fereign finished steel will be brought into this country this year. Belgian steel is selling at \$7 a ton under domestic prices.

One of the hopeful signs in the trade

of 50,000,000 tons yearly, whereas the practical capacity of the country is regarded as 54,000,000 tons.

Probably to counteract adverse sentiment in steel, Judge E. H. Gary chairman of the Steel Corporation, gave out a statement last week, which contained many optimistic expressions. He said that incoming business was at the rate of 60 per cent of capacity, which probably means that for the independent companies the rate is about 55 per cent.

Inasmuch as prices have been easing off somewhat some projects are being of somewh

WASHINGTON IS CREW VICTOR

Wins by a Wide Margin Over California-Bears Take Track Meet

Estuary to witness the competition.

Approximately 20,000 persons were present at the regatta. Ideal weather made the event one of the best yet witnessed on the Estuary. An incom-Ing tide, no wind, a warm morning, the Washington crewmen added a fourth consecutive victory since 1921 when California's crew won the national rowing championship.

Wisconsin Second

The California track team had an easy time winning a triangular meet held with University of Wisconsin and held with University of Wisconsin and the Southern California Conference Allstars held Saturday afternoon on the California Oval at Berkley. The final score board showed California to have 65 points, Wisconsin 39½, and the All Stars 29½.

H. F. McAndrews '26, was Wisconsin's star performer, and the highpoint man of the meet. McAndrews took a first in the 100-yand dash, a first in the 100-yand dash, a

game, finding E. A. Nevers '26, Stanford pitcher, an easy mark, finally knocking him out of the box.

Saturday afternoon's game will go down in Leland Stanford-California baseball history as a record breaker.

To J. A. Dixon '26 wielder of the bat, and otherwise left fielder, and J. L. Nounnan '26, California boxman, went the honors of the occasion. Divos control of the control the honors of the occasion. Dixon accounted for three runs in the first inning of the contest when he knocked a home run with two men on base. In the third inning the California left fielder knocked out another home run, this time with three men on the bases. Dixon added a double in the sixth and a single in the sixth to his batting average, making two homers, a double and a single out of five times at bat J. W. Lawson '25 and C. R. Johnston '25 shared batting honors in the Stanford ranks for the game, with two singles each. Stanford's only real showing came in the first half of the second inning when the Stanford nine made three runs, making the score at the honors of the occasion. Dixon acmade three runs, making the score at that stage of the game 4 to 3 in favor of California. The score by innings:

Innings1 2 3 4 5 6 7 8 9 R H E

JACKSON DROPS FOUR

CHICAGO. April 13—Four games against two rivals were lost here Saturday and Sunday by C. L. Jackson of Detroit in the tile race of the National Championship Three-Cushion Billiard League. A. K. Hall of this city made it four straight Saturday made specified by taking both games, G. L. Copulos of this city made it four straight Saturday made specified by taking both games, G. L. Copulos of this city made it four straight Saturday in 68 innings. So to 46 in 62 innings and 50 to 49 in 52 frames. Jackson which thall's scores were 50 to 4 in 62 innings and 50 to 49 in 52 frames. Jackson made high runs of 4 and 5 for Hall. A. H. Kieckhefer, the other local entry, with whom Jackson plays twice against today, went out Saturday in 68 innings, 50 to 46, and in 40 frames, 50 to 25. High runs of 5 and 7 were made by Kieckhefer, 5 and 8 by Jackson,

Williams College Expects Good Nine

Coach William Murray Developing Efficient Infield and Outfield Material

Take Track Meet

BERKELEY, Calif., April 13 (Special)—With a month's practice behind them, and one week more ahead before the first game with Rensselaer Polytechnic Institute, the Williams College baseball team is rapidly rounding into shape for its spring season. Coach William Murray, well satisfied with the material at hand, has put his men through rigorous training and daily practice on Cole Field in preparation for what he hopes of the control of t

on the Oakland Estuary morning.

Although the California eight took the lead at the start, with a 36-a-minute stroke, the Washington crew passed them at the half-mile mark and pulled away, using a 34-stroke.

The Washington crewmen came within two seconds of tying the California-Washington crew record when they rowed the course in 15m. 9s.

Only once did the California eight show signs of overcoming the lead which the northern boat had, and that at the mile mark when the Washington crew was leading by five lengths.

BRAZILIANS WIN AT BERNE BRAZILIANS WIN AT BERNE
BERNE, Switzerland, April 13—The
Brazilian soccer football team won its
first game in Switzerland Saturday when
it defeated the Berne eleven, 2 to 0.
The contest was played on the new
Eerne field in the presence of Jean
Musy, President of Switzerland, members of the federal council and many
members of the diplomatic corps, including Senhor Do Riobranco, Brazilian
Ambassador to Switzerland. The Swiss
team won the honors in the first half,
but the South Americans played with
great speed in the second half and
scored two goals.

Have Many New Rules to Learn Show Three Changes

Will Unify Swimming Practice Throughout Educational Institutions

Special from Monitor Bureau CHICAGO, April 13—Swimmers in college and university dual and championship meets have many new rules to study before the next campaign as a result of the meetings of the Rules Committee of the National Collegiate Athletic Agreeistion at Evanyton held Athletic Association at Evanston held here in connection with the second annual national aquatic title races.

These new rules, according to F. W.

The plunge for distance or time was he crashed through the forward line, and outflanking the secondary defense suddenly swerved over to the center of the ice and sent the puck whizzing past Miller. At 13m. Cotton scored another goal for the Jackets. Recovering the puck in his own sector he skated the length of the rink after filtering through the defense and shot it into the net. The Hornet defense is the official water game, being substitute.

The plunge for distance or time was closed in lice here of the board white. Overtime periods in high school overtime periods in high school overtime periods in high school stated of five. Although this change takes the form of a hint it will be inserted into the official guide as a definite rule.

W. H. Ball of New York, representing the y. M. C. A., was re-elected chairman of the joint committee; G.

Saturday when the New York owners are presented a written application for a franchise, binding their verbal agreement of some months ago, and were admitted to membership.

In addition, T. P. Gorman, former manager and secretary of the Ottawa team, who has signed a five-year contract with the New York Club, purchased two players from the Canadiens and secured the rights on two amateur players who have been on the reserve lists of two of the clubs. Canadiens sold Odie Cleghorn and E. Matz to New York and it is considered likely that Cleghorn will be appointed playing manager and coach

with the exception of the first two holes of the afternoon round, when he missed his drive at the first and was out of bounds at the second, Yates played consistently and safely to win the title. He played the remainder of the course in one over par at each hole.

Fownes was out in 41 and Yates in Saskatoon in the Western Canada League.
Canadiens surrendered their claim to Walter Kelterborn of the Niagara Falls Senior O. H. A. team. while St. UNITED NORTH AND SOUTH GOLF CHAMPIONSHIP-Final Round

A. W. Yates. Rochester, N. Y., defeated W. C. Fownes Jr., Pittsburgh, 10 and 8.

PLAN NEW PRO LEAGUE

The meeting indorsed the action of the president in suspending and fining each of the players of the Hamilton Club \$200 for refusing to meet the Canadiens for the league title last month unless the Hemilton Club gavethem a bonus of \$200. The next meeting of the league will be held in New York City.

Basketball Rules

Joint Committees of Y. M. C. A., A. A. U., and N. C. A. A. Work for Standardization

NEW YORK, April 13 (A)-Three radical changes in the basketball play-

The changes include the abolition of all zones, the elimination of the hand Northwestern University 60-foot pool jump ball and a provision that a ball which hits the edge of the backboard dared shall be considered in play unless it caroms out of bounds. These alterations were made to unify the playing ode and standardize the game as played in the east and west.

The rule which abolishes the placing of the hand behind the back was modified so that the same result is obtained. The lawmakers inserted a clause in this rule which reads: "Any use of the hand not used in tapping the ball shall be construed as a personal foul."

The rule abolishing the zones was supplemented by a rule which reads: "When a Player is fouled in the act of shooting for a goal in any part of the figure two first and the same result is obtained. The rule abolishing the zones was supplemented by a rule which reads: "When a Player is fouled in the act of shooting for a goal in any part of the figure two first and the same result is obtained. PICK-UPS

BOSTON fans, after the first game of DOSTON fans, after the first game of the Red Sox and Braves series Saturday, are satisfied that their teams are much better than a year ago. The Braves won the opening game of the series, 4 to 3.

Announcement was made today that Myron Paim, former Pennsylvania State College athlete, had been signed to play baseball for the Harrisburg Club of the New York-Pennsylvania League. He was noted for his ability as a hitter in his college days.

Manager T. E. Speaker of Cleveland will probably start either S. M. Smith or J. B. Shaute against St. Louis, to-morrow, in the opening game of the season.

Basing his belief that reserve strength

Howell Hard Pressed

R. E. Howell '27 of Northwestern was forced to his limit to win the 220-yard free style race from R. S. Hayes of Princeton. At the half way measure Hayes built up a slight lead, using 612 strokes to 7 for Howell to make each length of the tank. Howell sprinted by increasing his pace to 8 strokes and took the title by a scant foot. His time was 2m. 23.7s., which is 3.2s. slower than his national record for the event.

Umpire assignments for the opening Umpire assignments for the opening National League games, announced today by President J. A. Heydler, follow: At Chicago, E. C. Quigley, C. B. Morax, Frank Wilson. At Cincinnati, Henry O'Day, C. H. Pfirman, J. M. Sweeney. At Brooklyn, Charles Righer, Robert Hart, Peter McLaughlin. At Boston, William Klem, H. J. McCormick. Manager Speaker of Cleveland states that he has the best array of left-handed pitchers that ever wore a Cleveland uniform. President E. S. Barnard thinks the team as a whole is the strongest that the Indians have had since 1920 when the team won the pennant. This speaks well for Cleveland's pennant hopes.

save second place in a battle with his tammate, P. M. Corbett '25. The Tig-cr's time was 5m. 24.5%, nearly 12s slower than Howell's record.

With a performance of outstanding brilliance, W. D. Krisel of Columbia University captured the low-board fancy diving title. He compiled 103.7 points, defeating a field which included the champion and former champion of the "Big Ten." Erling Dorf '25 of University of Chicago, the western titleholder, was fourth, while H. E. Bird '25 of Minnesota, former crown wearer, was third.

Farley Wins Race

J. I. Faricy '27 of Minnesota, former crown wearer, was third.

Farley Wins Race

J. I. Faricy '27 of Minnesota, world's and national record holder in breast-stroke races, was given fast competition by C. H. Allen of the Navy. The latter led to the final lap, but Faricy advanced steadily by use of the "fish tail flip" instead of the conventional "frog kick." Allen sprinted by taking two arm strokes to one leg stroke and made it a great race to the finish.

Despite the field which included holders of many records, the only record broken was in the backstroke "YALE TEAM DEFEATED"

Record Entry List in Penn Carnival

Six Nations Will Be Represented Among 646 Teams Which Are Expected

PHILADELPHIA, April 13 - Compilation of the entry list for the Pennsylvania relay carnival, April 24 and 25 completed today, shows that 646 relay teams, representing 525 colleges and schools, are entered for competi-tion in the big meet. This is the larg-est list in the history of the games. Nearly every section of this country, Canada, England, New Zealand and Cuba are represented. Choice places were well distributed

today in the drawing for positions at the pole. Boston College, holder of the today in the drawing for positions at the pole. Boston College, holder of the two-mile relay title, will not compete in that event, due to the loss of Mahoney, one of its best half milers.

The drawings in the college championship events resulted as follows:

EDITORIALS

On the theory that half a loaf is better than no bread, some of the endeavors recently made

Progress in Clean Journalism

by certain newspapers to minimize the crime reports in their columns merit applause. Incomplete and illogical as they are, they may not contribute much to the final solution of this problem. But the very

fact that the relation of the newspaper to crime is now recognized within the profession as constituting a problem to be grappled with is in itself a sign of moral progress. It is seldom nowadays that a newspaper of standing defends sensationalism in its columns-rather it denies the charge, trusting to clamorous denials to confound its critics.

Even the time-honored defense that publicity given to crime affrights possible criminals and contributes to the maintenance of law and order is seldom offered today. The weight of expert and specific authority against this theory is so great that few venture to advance it. The general plea now is that readers demand stories of crime and that they fill but a small proportionate part of the newspaper anyway. If the two wings of this explanation fail to flap in unison it is simply because no defense of an indefensible position can be logical and har-

In Decatur, Ill., the Review tried for a week the plan of segregating crime news in a single column of the first page under an inconspicuous headline. In Bakersfield, Calif., the Morning Echo announces its purpose of banishing all crime news from its first page, and eliminating from such stories all save the essential facts. The Register of Des Moines, Ia., not being prepared for the radical step of eliminating all crime news, adopted the device of publishing it on a single page with the plea that those averse to reading matter of that character could throw the entire page away. And, finally, the Observer of Fayette, N. C., has taken the more radical and logical course of eliminating absolutely for two weeks all crime news from its columns with the proviso that at the expiration of that period a vote of its readers will be taken and the future course of the paper be guided in accordance with that verdict.

None of these papers, of course, is of metropolitan standing. Yet as a group they represent every section of the United States. They show that everywhere pressure for the reform of journalistic methods is sufficient to disquiet publishers and make them wonder whether some change would not be advisable. The country and small town press, always in closer touch with its readers, is naturally the more responsive to this pressure, but there is not the slightest doubt that the newspapers of larger cities are experiencing it. Indeed, in Chicago the revolt has attained almost the proportions of an organized repudiation of both of the morning papers. But not until the attack touches the "pocket nerve" of these publications will any material reaction be apparent.

It may well be questioned whether the device, adopted by certain of these papers, of asking for a vote of readers upon the question of either segregating or eliminating crime news will prove of value. The appetite for sensationalism, like the appetite for drugs, grows with what it feeds upon. A fortnight of enforced abstinence does not heal the addict in either case. But the moral responsibility rests upon the editor, whatever may be the expressed opinion of such of his readers as may join in a verdict of this character. If he cannot determine for himself whether it is the part of dignified, helpful, clean journalism to spread before the world day by day the disgusting or depraying details of crime and scandal, he cannot absolve himself from responsibility by taking a plebiscite among his readers on a question of pure morals.

Progress toward the more enlightened treatment of inmates of Canadian penitentiaries is

Light in Canadian Penitentiaries

recorded in the latest annual report of the superintendent of penitentiaries, Brig.-Gen. W. S. Hughes, D.S.O. Discipline is insisted upon. But proper discipline does not tolerate dun-

geons, chains or any form of cruelty or brutal treatment. Real discipline, indeed, it is affirmed, must be humane, just and firm. The aim of the penitentiary administration is rather to make better men of

It is frankly admitted that in this great work, improvement of the system, although it is excellent in some respects, is still much to be desired. The Canadian superintendent stoutly declares: "A penitentiary has no right to exist if mmates discharged from same are not turned out better citizens than when they entered." He urges that in addition to receiving a fair education and learning a trade, they should be paid a fair wage for labor well performed. They would thus be enabled to assist in supporting those dependent upon them; at the same time they would be well grounded in the matter of their responsibility as citizens. It is submitted that this may be done by the Government providing sufficient work to keep all inmates suitably and continuously employed, under the direction of the proper class of officer.

Useful work and the right kind of supervision, then, are regarded as two of the great essentials in connection with penitentiary management. Because of the vital importance of character building, stress is laid on the necessity of exercising care in the selection of all officers employed. The superintendent of penitentiaries

On a religious conception of the entire prison problem prison reform must be based. It is a recognized fact that, in order to secure a rebuilding and satisfactory reconstruction of the inmate's character, his heart must be reinhed. This may be done by law-abiding, God-fearing officers.

Reports from the penitentiaries indicate that this desirable standard of administration is being attained. It is to be seen in better living

conditions for the inmates: dingy cells have been replaced by white enameled rooms, with cleanliness, sanitation and light.

At the large penitentiary of St. Vincent de Paul, near Montreal, an educational system has been established which has done much to reduce the percentage of prison illiteracy. The warden there, Col. R. de la B. Girouard, is also a firm believer in the regenerative influence of useful employment. In urging that the convicts should be employed in the manufacture of some commodity, he says: "It is a grievous mistake in my opinion to imagine that all who are condemned to penal servitude are hopelessly lost. If such were the case it would indeed be a travesty on the teachings of the Master." Perhaps the Dominion Minister of Justice, Mr. Lapointe, who is the political head of the penitentiary department, may find it possible to give the penitentiary inmates more work in the manufacture of government supplies.

In a most interesting lecture delivered on Sunday at the Harvard Medical School in Boston,

Relation of Beliefs and Disease

Dr. C. Macfie Campbell, professor of psychiatry in that college, took as his topic "Beliefs and Delusions." He is quoted as having said that physicians now look upon abnormal beliefs and delusional fancies as forms

of illness, and in treating them as such, endeavor to restore their patients to the full level of health and social usefulness. The speaker, apparently without great concern as to just how far his logic might lead him, proceeded to discuss, as he views it, the relation of beliefs to the individual and collective welfare of mankind.

The speaker called attention to the fact that while the proper consideration and study of beliefs might seem to belong more to the philosopher or the theologian than to the physician, the latter, he observed, has the matter thrust upon him in the course of his daily work, and has to deal with the views held by the individual as a health problem which demands practical consideration. He continued:

Belief is no abstract condition; it represents the actual attitude of the whole personality to the demands of a complicated environment; it is one aspect of the behavior of the individual. In the adaptation of the individual to environment, thought is a function of considerable importance and one which cannot be explained in simple terms, such as those of chemistry or physi-

Dr. Campbell emphasized the wisdom of endeavoring to correct the wrong beliefs and their resulting diseases and discomforts, by putting right concepts in their place. He pointed out that even among medical practitioners there are marked stages of development in the methods employed in treating a belief in disease. The first aim, he said, was to cure disease, a broader aim has been to prevent disease, "and finally one has come to take a positive interest in health, not as a mere freedom from disease, but as the well-balanced development of the whole personal endowment.'

It is interesting, in reading the text of the speaker's remarks, to note that he made no effort to exempt from the maladies which he believes can be overcome by a conception of fundamental truths those diseases which some of his less liberal brethren insist must still be treated by approved material medicine methods. Dr. Campbell makes no reservations. And he includes communities as well as individuals in the lists of those whose most serious problems may be met by a simple and direct process of readjustment. He says:

The personality of the individual, as represented by his beliefs, may well be looked on as a central health problem, and the health of the community may come to be measured, not only in terms of infantile death rate and general morbidity statistics, but in terms of those beliefs which direct its organized activities

It is no secret that there is going on, not only in America, but throughout the world, a revolution in individual and community thought. It is not that ways are being sought out by which disease may be cured or prevented, but that there may be brought to human realization a sense of freedom from a belief in the existence of any discordant condition. Mankind will have wrong beliefs and delusions just so long as there is lacking the true concept which displaces and destroys them. The slate upon which thought records itself is never blank. But it is encouraging to those who have learned to realize that upon it may be written whatever one wills. It has been repeatedly proved that "As a man thinketh in his heart, so is he."

There persists the tradition that far beyond the leagues of ice which yield to no summer

The Search for a Lost Continent

sun or breezes, there lies a continent as yet undiscovered. This year, as if in fulfillment of the prophecy of Admiral Robert E. Peary, attempts will be made to bridge these vast ice floes and to explore what

has come to be thought of as the vast lost continent of the far north. Always in the hearts of men there has existed the love of peaceful conquest and discovery. What wonderful opportunities have been given, since time immemorial, for the indulgence of this ambition to find new lands and new seas-new only in that they heretofore were undiscovered and unexplored.

It will not add greatly to the sum of human resources, perhaps, should the quest of Donald MacMillan, plans for which have been at least semiofficially approved in Washington, be successful, or if that other expedition captained by Roald Amundsen is first to outline the scope and boundaries of the land farthest north. It will not be a country to which the adventuresome opportunity seekers of any nation will rush in search of homes or riches. For many years, even if its characteristics should become better known than they are today, it probably will remain inaccessible and of no practical value save possibly that it may provide emergency stations for air craft which may follow the Arctic route between England and the Far East.

This year's expeditions, like some others unsuccessfully attempted, will be by airplane from starting points as near the North Pole as water craft can carry the exploring parties and their equipment. Many important improvements have

been made in the airplanes to be used even since Captain Amundsen's last unsuccessful effort, and it is encouraging to know that the financial and official backing of both explorers is sufficient to insure success if success is at all pos-

The area, whether it be land or ice, is virtually the last upon the earth's surface that has not been traversed. The whole domain of the human family, save that in the Arctic regions, has been charted and mapped. Man's inherent inquisitiveness cannot much longer endure the delay which thus far could not have been avoided in peeking into the last hidden corner. In another year, perhaps, and possibly sooner, the great blank expanses of the northern map may be revised to show the existence of a new continent. After that, so far as the terrestrial sphere is concerned, it will remain an open book, its last riddle solved, its last great query an-

A statement from the Grand Central Art Galleries to the effect that about three quarters of

a million dollars in sales has been recorded during the first two years of its existence sets the seal of undoubted success on this unique art venture. When the initial project of this novel partnership be-

A Successful Art Experiment

tween patron, artist, and a twentieth century business' point of view was launched in the spring of 1923, the answer was, mainly, a shrug and a lifted brow. Who ever heard of such a thing as a non-profit making organization taking the attic of a railroad station in the name of big business and hoping to make a go of it? It was too utterly fantastic and a little too barbarous besides to be considered.

However, since the opening day of this adventure in the palatial eaves of New York's depot de luxe, enough art has been ledgered to make for great rejoicing among those who supported Walter L. Clark's vision of lambs and lions yoked for the plowing of virgin lands. Not only does this co-operative organization supply its artist members with all year round exhibition space, but it gives them the privilege of reaching a newly created buying public at home and abroad, and of marketing their wares under as systematic and efficient a selling and publicity policy as any other group of producers.

There is no doubt that a work of art, once it has left the artist's hands, is as marketable as any other commodity; and there should be no real loss of caste and value in being so handled. It is therefore distinctly in line with the times that such an organization as the Grand Central Galleries should have arisen and at the time it did. Except for the small minority of creative workers who command their own market, the average artist is dependent on reaching a proper and sufficient public. And it is here that these galleries are doing a valuable service by enlarging the borders of present-day patronage. Already two important buying centers have been created solely through efficient presentation of subject matter, two places as widely separated as Aurora, Ill., and Atlanta, Ga., and at each visit to the handsome total of thirty-odd thousand dollars.

This altruistic enterprise, possessing the largest galleries of their kind in the world, has already made good. Sales of the past months have trebled corresponding periods of the first year. It has already held the notable retrospective Sargent exhibition of last season, and has housed a large loan collection of English paintings this season. Next winter the grand Centenary exhibition of the National Academy of Design is booked for the Grand Central; also the famous Carnegie International Art Exhibition is to be held in New York for the first time in the spring of 1926 at the same place. With increased experience and supply the present policies can be strengthened and broadened almost ad infinitum. In the words of its president, the surface has hardly been scratched. Something new under the sun has been broached in the world of art, and it is splendidly crowned with early success. As its contacts widen with the years and its selling forces become more equipped to handle its enlarged responsibilities, the future of the Grand Central Galleries can hardly be estimated.

Editorial Notes

Prohibitionists will welcome the information vouchsafed by Wesley Westbrook, warden of the Cook County jail, that prohibition has not caused the reported increase of crime in the vicinity of Chicago, and that there are far fewer men sent to the jails today for being drunk than was the case before prohibition became effective. "Prohibition," declared Mr. Westbrook, "is only an incident in the crime situation." He added that in Chicago, though the jail was overcrowded with 1000 prisoners, only about 20 per cent were in it because of liquor. He said, moreover, that throughout the United States more bootleggers are in jail now than ever before. The liquor interests may be able for a short time to persuade a certain proportion of the people that prohibition results in evil consequences, but one recollects a statement about a fig tree not bearing thistles. Give the truth a little time, and it inevitably will "out."

That the teachings of natural science have changed greatly during the last few centuries is, of course, common knowledge. But that these changes have been so radical as to amount to a complete overturning of the whole of its former edifice, few probably would have dared to say outright. Such, however, is the case, it appears, if one believes the conclusions reached by Paul R. Heyl, of the United States Bureau of Standards, in a remarkable article in the periodical "Science." Those conclusions Mr. Heyl summed up in the following words:

Where, then, has the progress of three centuries in physical science brought us? Of the many distinct concepts of the eighteenth century not one is left. The sole concept of modern physics, energy, was not known in the eighteenth century, and this concept is above all things immaterial. The theoretical structure of our science is left without material means of support. Could matter be wiped out more effectively?

The Heart of His Lordship's Mystery

He was tall, fur-coated, and looked like a mighty sportsman. I met him just as he was rushing out of A. E.'s office in Plunkett House, Dublin. It seemed to me-for I knew him only through his plays-that this big breezy out-of-doors individual could not possibly be Lord Dunsany. Yet it was he. I longed to fathom the heart of his mystery.

Dunsany lives in a castle, which somehow escaped being blown up by the Republicans; evades all talk of politics; and is, in truth, despite the solidity of his exterior, about as evanescent as a moonbeam. Hard to catch, elusive, always disappearing into mists. My request for a talk was met with a fairly dubious, "Perhaps—I shall be back in town shortly, and will try to arrange it." He was gone. A moment ago he stood here before me; now he was gone—snatched into space. Was it likely I should be able again to waylay him? Baffled, I thought not. however, I found a telegram at the

club which read as follows: "Have nothing interesting to say, but would gladly show you Dunsany Castle if you would come today about

I tossed this message to the friend with whom I was lunching. "How does one get there? Is it far?" ther, I suspected, than one could go without enchanted boots. But no, my friend replied. There was a train leaving Dublin at a quarter to three. "You go to Drum-ree, the nearest village. From there the castle is only a stone's throw. There will be plenty of carriages.'

My journey ambled through haunting Irish country, flat at first, then gently rolling, dotted with clumps of woods fit for druid or elf. I saw ever before me the furcoated mighty sportsman, and kept revolving in my mind how I might come to the heart of his mystery.

In something short of an hour the train reached Drumree. No mistaking it, for the name was written up across the station. But there was nothing to indicate the presence of even the humblest town, nor were there any carriages. The train steamed off, leaving me alone on platform, prey to debate as to what should be the next move. A boy was working near by in a field, his lips busy

with whistle. I hailed him, explaining my dilemma 'Shure, an' you've only to walk over the bridge, take the first on the left and then the second on the left," he answered. How far? "By road, three miles and a half." Though staggered, I thanked him, and thought it, as a matter of fact, not unlike an episode in fairy lore, thus to be inquiring of a peasant lad the way to Dunsany

Time, of course, represented the problem. Already it was nearly four. How long would it take me to walk three and a half Irish miles—notoriously the longest miles in the world? And once arrived at the castle, how should I get back to Drumree for the 5:47? There was no later train to Dublin. That they might prevent my piercing the heart of his lordship's mystery, the gods of the mountain were conspiring.

I crossed the bridge and took the first turning on the It was a lovely winding road lined with old trees. Meadows dreamed under an afternoon sun. There was a faint haze over everything. Irresistibly I found myself yielding to a mood of wonder which was akin to awe. 4 4

When I had gone some distance, and fancied I must now be near the castle gates, I saw approaching me a man whose full black beard exposed a kind of benign tolerance. He came abreast, just at the second on the left, and to make sure I asked him the same question previously put to the peasant lad.

A leisurely hand on his beard, "This lane," he replied, "would take you there. It is about three miles."
"Three miles!"

"Faith, it might be better if you kept the main road to Dunshaughlin-that's only a mile, and you could hire

I accepted his counsel as oracular, and, wrestling more alarmedly with calculations of time, hurried on. Even were the castle reached by five (and I was to have been there at four), how much time would remain for the talk by means of which I should get at the heart of

his lordship's mystery? The mood of wonder deepened. Surely there was something strange about this landscape-a magic, working through wan late sunshine-light as tinted air, yet with a sudden sense of darkness. Abruptly, as I raced along, it came to me that nothing mattered save this. That though I never reached the castle, I had begun to fathom what I sought.

Yes! The key was here, in this whispering, dream- have been seen on Broadway.

ing countryside. By chance, treading the roads of a heath which was native to him, I had pressed a secret spring. It was as though the man I searched—ever eluding, ever vanishing into mists-were by my side instead. I understood! Here was my answer; here the truant

Far off a sweet gray spire trespassed upon the sky. Sunshine was growing amber, and furry cattle browsed slowly toward the place of their night's repose. When at length I came to Dunshaughlin I found merely a huddle of forlorn bouses, one of which was marked though as such it had manifestly long ceased to function.

Entering a dark little shop where provisions were sold, I bargained for a motor, and while it was being got ready, talked with the shopkeeper's wife. know him, indeed! Shure, an' was not his lordship a friend to the whole countryside? Was he not always doing nice things for folk? At Christmas a ham, or a bag of flour, or perhaps a brace of game birds. No, she had never read any of his lordship's books, but had

'seen about them" in the newspapers.

The motor was at the door, and we departed, the shopkeeper and I, down a road that might lead, who could say whither? Time did not matter. For everywhere now. upon all sides, I perceived the personality of the man who had wired: "Have nothing interesting to say."

Shaggy goats jerked their heads to stare as we passed. The trunks of gracious trees were green with age, and their leaves sibilant with secret utterance. I saw how my lord had not delved back into an age of myth, but dipped his pen in the soil of which he was a part. He could never escape me again! I held fast to his lord-

ship's mystery.

Half smothered in lichen, a tower showed its crene lated top. We had reached a pair of massive iron gates; and as my driver crouched a shoulder to the task of swinging them wide, he looked oddly small. Then on we went, across a castle park. There was a ruined chapel through whose unglazed Gothic windows the breeze played, fragrant with earth and water scents.

Twilight was upon us. And beyond a blur of myrtle I saw the castle—a perpetual rustle of ivy—indeterminate turrets and gray walls-rooks flapping. It was five o'clock. We must start again for Drumree in a quarter an hour. It did not matter. Nothing mattered now, for I had plumbed the heart of his lordship's mystery.

I pulled a bell-wire at the door, and waited. There was profound silence. The castle was not real, of course. It was an enchanted castle. One minute, two. In a mysterious distance spat the crack of a woodman's ax. Near at hand was the twitter of many birds. My quarter of an hour was dissolving into thin air.

At last, precipitate steps within. The door swung

open, and a gorgeous butler stood before me, murmuring apology for a bell that was out of order. The master of the castle, just as in some piece of immemorial lore, had glanced down from his tower and had seen me there on

The butler, still with ceremony (though I guessed him to be a son of this rural environment), begged me to mount—announced my arrival—bowed. Lord Dunsany came forward, a hand out to welcome. He was dressed n riding costume, and conveyed no hint of the mind hat goes forth on strange journeys. But I knew. I understood. There had been adventures along the way Dunsany, friendly and simple, and casual, too, greeted me also.

That was all. A maze of rich fragmentary impressions—and talk which held no real significance. A sheaf of bright-hued quills with which my lord is wont to work at pixie speed-manuscripts bound in vellum and rare illuminated leather, upon whose pages was a scrawl so robust that the ink had soaked through, a sense of rovings across the face of the earth, up and down and home again-and that was all.

Here was my errand's end. I had barely come, and must be off, a tall clock warned. Yet there was no feel-

"I shall have to see to that bell," said Lord Dunsany. They descended the long flights with me to the outer door-cordial and casual and unrevealing-just a lord and a lady who lived in a castle. They did not guess how much I knew.

The castle vanished, then the ancient gates. After a while I could not be sure if the gates had really been there at all; or if the castle in fact existed, lost in those slumbering meadow-lands where I had sounded a heart of mystery; or even the lord of the castle, whose plays have been seen on Broadway.

E. A. J.

The World's Great Capitals: The Week in Moscow

Moscow, March 19 Premier Rykov was the outstanding speaker at the opening session of the Tsik, or All-Union Soviet Executive Committee, in Tiflis not long since. Discussing the international situation, the Premier expressed the hope that America would recognize Russia in the near future, and touched on the advantages which both countries might anticipate from the co-ordination of American technique with Russian natural resources. The Premier declared that last year's drought covered one-fourth of the area which was affected in 1921. The Government spent 85,000,000 rubles in direct relief measures in the The chief aim of the Government, according to Mr. Rykov, was to prevent any diminution of the planted area in the affected districts. Now, of course, the prospects of next year's harvest were beginning to attract attention. He pointed out that, as a result of insufficient snow and variable weather, alarming news about the coming harvest came from some regions, but he added that only the spring could show decisively what sort of crop this year may be expected to bring forth.

One cause for the comparatively slow progress of Russia's agricultural reconstruction is the extreme poverty of the majority of the Russian peasants. This poverty is vividly reflected in figures which have just been published, showing that 32½ per cent of the peasants in the Russian Soviet Republic have no horses, while in the Ukraine the figure is as high as 52.7 per cent. Out of the 22,000,000 peasant households in the Soviet Union, 8,000,000 are reckoned among the "poorest of the poor." The favorite theoretical remedy of the Soviet Government for the distress of these poor peasants is to or ganize large farms along collectivist lines and equip with modern machinery. But this is a slow difficult process. A means of relief which is probably much more appreciated by the peasants themselves is indicated by Mr. Kalinin's announcement at the session of the All-Union Soviet Executive Committee that the agricultural tax will be cut down 30 or 40 per cent this year, as compared with last.

The Afghan Embassy in Moscow recently held a celebration in honor of the seventh anniversary of Afghanistan's independence. Russia was the first large power to recognize Afghanistan's claim to independence, and in 1920 the Afghan Ameer, Amanullah Khan, addressed a glowing letter to Lenine, whom he characterized as a benefactor of humanity and the Eastern peoples. the conclusion of a treaty between England and Afghanistan, there was a certain cooling off in Soviet-Afghan relations. The former Ameer of Bokhara, driven into exile by the Soviet revolution in his own country, found asylum in Afghanistan; and, although the Ameer himself apparently maintained a correct position, certain Afghan tribal leaders are believed to have been implicated in the native uprising against the Soviet Government in Turkestan and Bokhara which took place in 1922. As this uprising subsided, however, the Soviet-Afghan relations became more normal, and at the present time the two governments are discussing the possibilities of a commercial treaty.

The present commercial situation in the Soviet Union is not altogether satisfactory and furnished a topic for discussion at a recent session of the Council of Labor and Defense. The most unsatisfactory economic symptom is the steady and increasing decline in the trade turnover during the last two or three months. This is attributed to several causes, to seasonal decline in buying, to the impassable condition of the roads, which prevents the peasants from coming to the market towns, and to the apprehension of the peasants about the spring crops. Some economists have advised a cutting down of industrial production, but the general sentiment is against this, on the ground that the heightened producin industry, which is due to increased productivity of Labor, is an economic gain which cannot be thrown

away. The Council of Labor and Defense recognized the shortage of trade capital as one important factor in the present situation, and advocated easier credit terms for the co-operatives and larger scope for private capital in the field of trade, as measures calculated to relieve this

The international holiday of Working Women in Russia was observed here recently. The day was marked by the opening of a number of nurseries, co-operative laundries and restaurants, and other institutions designed to lighten the work of women. At the same time a cam-paign was launched to combat and alleviate unemployment among women, which is already beginning to have serious social consequences. A law is proposed which would forbid the dismissal of mothers of young children and unmarried women from their positions without the previous consent of the Bureau of Labor Inspection. Vocational courses are to be instituted for the benefit of women who are already unemployed.

Regarding the Sack of York Village To the Editor of THE CHRISTIAN SCIENCE MONITOR:

The burning of the straggling village of Washington, D. C., by the British forces during the War of 1812 was recently mentioned in an issue of the Monitor and is often cited by Americans as an illustration of the barbarity of war. Too often, indeed, the manner in which it is quoted seems calculated to reproach and remind our British friends of today of the misdeeds of their forefathers. Would it not be more candid on our own part as well

as helpful to a better international understanding if, when the capture and destruction of our national capital be in future mentioned, it were accurately described as an act of retaliation by the British for the previous sack and burning of the little Canadian village of York, then the seat of government of upper Canada and standing where now does the city of Toronto? York village had no military or strategic importance

whatsoever, but was nevertheless ruthlessly destroyed by American soldiery, and its entire population, consisting entirely of women, children and old men, driven out helterless to undergo all the rigors of a Canadian winter.

Today British and Americans are unanimous in the condemnation of all barbarity and wars, but it is good for us to remember that so brief a record of national existence as even our own is by no means stainless. In his case, to accuse the British is to condemn ourselves, for our own wanton cruelty preceded and provoked their act of retaliation which, unlike our own crime, was accompanied by no destruction of innocent lives.

"Liquor Drinking and the 'Movies'"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: In the Monitor recently a letter was run dealing with liquor drinking and the "movies." I feel so keenly on this subject that I am sending these few lines in this same connection. This question is of vital importance

to our young folks. When one reads the advertising on the billboards of the "movies" in any small town, one hesitates to take his child to see them. Much good may be done by refusing to patronize these shows, also by appealing to the managers of the screen houses to put on clean educational plays which can be made both interesting and

entertaining. Let us safeguard the children! Ellensburg, Wash.

INLAND EMPIRE BOUNDED BY CASCADES AND ROCKIES DEVELOPS RICH RESOURCES

STRAWBERRY FIELD in the INLAND EMPIRE

Growth of Territory Embracing Parts of Four States and Two Provinces Evidenced in High Yield of Its Mines, Farms, Ranches, Forests and Orchards

SPOKANE, Wash. (Special Correspondence)-Lying between the Rocky Mountains on the east and the Cascades on the west is the Inland Empire. It is an empire whose sovereigns' are Community of Interest, Singleness of Purpose and Common Necessity, arising from a natural isolation.

Within this territory are parts of two nations, for it includes southeastern British Columbia and southwestern Alberta in Canada, and western Montana, the panhandle of Century's Supply of Finest Chamber of Commerce Adopts Program for Rich Idaho, eastern Washington and northeastern Oregon in the United States. The greater part of it was in the "Oregon" of

the American pioneer. It was the team and his family, and it was in

plow and turn out his fortune. trail was beset by innumerable difficulties, not the least of which was

penetrating the high mountains. Their search for a pass or defile that great divide was aided finally by an Indian who guided them through nasses known only to the tribe. No more romantic story of exploration and adventure has been written than the Lewis and Clark journals.

Scenic Beauty

Working their way down the Snake and Columbia rivers they passed hrough the southern fringe of what the people of that section are pleased to call the Inland Empire. Today four transcontinental railroad lines United States and one in Canada find no difficulty in penetrating those fastnesses, and from com-fortable Pullmans or observation cars the modern traveler and explorer may still view a rugged and formidable mountain or a stately and almost impenetrable forest.

He need not be disturbed lest the food be exhausted, or water bags dry, or that he may encounter un-friendly Indians. For here, in the midst of majestic mountains, foam-ing torrents or endless plains he has the comforts of this modern day, and delectable food in the dining car, wrested from these lands which once an exploring party be dispatched to own about 12,000,000,000 feet; 4,500,-the northwest "for the purpose of expresented an almost insurmountable

Scenic beauty abounds within this section. Included in it is Glacier National Park, and just outside the natboundaries are three other great reservations-the Yellowstone, Rainier National Park and Banff National Park in Alberta. All are within easy distance by automobilfrom all points in the Inland Empire. The roads are for the most part im-

completed, excellent dirt roads are kept in good condition. Both motor roads and railroads form a network which enables the visitor, student or traveler ample opportunity to view the natural wonders, study the geological stages which are written on the face of the land where all may see, or view the agricultural or com mercial development.

Potential Power

Approaching the Inland Empire Approaching the Inland Empire from the east the traveler is impressed by the ruggedness of the taken from the mines of Washington, and Idaho totals an energy reports are responsible for Rockies. Great, towering rocks close Oregon, and Idaho totals an enorby and lofty peaks set down in mous sum, and it is believed that the glistening glaciers, all softened by volume still in the earth greatly exdiverse colorings in rock and sky, ceeds the amounts sent over the and to the practical man, power.

In northern Idaho the timber lands practical knowledge of the situation, adjacent to the railroads for the most of the said that only a beginning has part have been logged off, and, where clearing has been accomplished, preclearing has been accomplished, preclearing has been accomplished, present a panorama of fruit, cattle, and agricultural lands, always with a ekground of distant hills or moun

For ten years after Whitman's Dairying is becoming an important taken from the various streams, from passing no new planting of crops took place. Then Ransom Clark, in 1857, set out an orchard on his 60acre tract. The following year came the soldiers to the new fort, and this provided a cash market for products. Agriculture got its start.
The Idaho gold rush of the sixtles brought its tens of thousands and an increased local and regional demand for food.

Agriculturally, Walla Walla Valley has reached its limit as far as dry farming goes, so it is working to get more land under water. Re turns from irrigated land are about \$300 a year per acre and from wheat land about \$11 an acre. About 18,000 acres are now under irrigation, and the number is being gradually in-creased. Projects still in the talk stage will greatly acreage. They will also bring about a denser population, though it is agreed that much of the wheat land will always be farmed by a few, since operation is costly and the land cannot be used for other than small grains.

LOWER SPOKANE VALLEY IS RICH IN RESOURCES

Section Developing Rapidly Through Fertility and Attractive Setting

SPOKANE, Wash., (Special Correspondence)-Spokane is located at the lower end of the valley of the Spokane River. Throughout most of ts course the river cannot boast of a valley for its field of activities. From Spokane to the Columbia the river runs between ranges of high hills which come down to its banks in many localities, again between steep and narrow banks and over bowlder-covered beds of glacial formation, for long stretches through box canyons and over falls and rapids. Throughout this region there is almost no cultivable land adjacent. But for about 40 miles east of the city a narrow valley borders the banks of

Approximately 29.000 acres in this valley are now under irrigation and planted largely to orchards. All kinds of berries, grapes and vegetables are also grown throughout the valley, which is mostly laid off in tracts of from one to ten acres. The section is traversed by two cemented highways, known as the Apple Way and Trent Road, one on either side of

The populous centers have become nally merging into one another, that for many miles east of Spokane there and the erection of buildings will be per is presented an almost unbroken vista of homes, including residential sections for Spokane business people, educational centers with groups of educational centers with groups of The Spokane university, a growing college buildings about which are institution established a few years clustered many residents. clustered many residences, besides a ago, is commandingly situated on a number of industrial areas of more knoll overlooking the valley and surthan ordinary importance.

Aided By Irrigation

no irrigation in the Spokane Valley. The annual rainfall in this section is not sufficient to depend upon for the production of crops, and the land would then bring not more than \$8 chardists, to \$10 per acre, with but very little and others demand for it even at such prices.

In 1903, when the first irrigation system was successfully established, most of the land then put under water sold for \$300 an acre, and several years later, when orchards were in bearing, exchanged hands for two or three times this amount

Nestling among these hills, at considerable elevation above the valley, are numerous lakes, some large and five irrigation systems have been constructed from as many of these lakes, and a total of approximately watered from them,

Adequate Water Supply

this purpose was found to be a bed or stream of water that underlies the whole valley. It has proved to be an inexhaustible supply wherever tapped. It is exceptionally pure and free from foreign substances. The entire water supply for the city of Spokane is taken from this source through wells sunk just east of the through wells sunk just east of the city. Throughout the valley 19 districts are pumping water from this source to irrigate a total of 7500 lished industry in the valley, and it usually has been a profitable busingular through wells sunk just east of the crew and sunk just east of the crew and it is source to irrigate a total of 7500 lished industry in the valley, and it usually has been a profitable busingular throughout the valley 19 districts are pumping water from this source to irrigate a total of 7500 lished industry in the valley and it usually has been a profitable busingular throughout the valley 19 districts are pumping water from this lished industry in the valley, and it usually has been a profitable busingular throughout the valley 19 districts are pumping water from this lished industry in the valley, and it usually has been a profitable busingular throughout the valley 19 districts are pumping water from this lished industry in the valley, and it usually has been a profitable busingular through the profitable busingular through the profitable profitable through the profitable busingular through the profitable busingular through the profitable p The total irrigable acreage of the

valley is about 40,000 acres. This valley is located partially in Washington and partially in Idaho. The Washington-Idaho state line divides the valley into two practically

equal parts. The length of the val-ley, from the city of Spokane in Washington to the city of Cœur d'Alene, in Idaho, is about 34 miles. Approximately 10,000 people have homes in the Washington section of Throughout its length the sur-

roundings are beautiful. The foothills of the western slope of the Rocky Mountains come down to the edge of the valley. As a rule they are heavily timbered, and as one moves up the valley the hills become higher, more broken and take on more the appearance of mountains, with snow banks visible on the crests during most of the summer months.

Industry to Be Producing Third of Output

SPOKANE, Wash., (Special Correspondence)-The virgin forests of the Pacific northwest are veritable gold mines in the production of wealth. According to federal reports, the production of lumber in this section in 1920 was 29 per cent of the total output for the United States, an increase of 411/2 per cent over 1910. The other states showed a decrease of 271/2 per cent covering the same period. According to estimates from reliable sources Washington, Idaho and Oregon in 1922 shipped more than one-third of all the lumber manufactured in the United States,

3,375,000,000 feet over 1921. A quarter of a century ago only about one-twelfth of the entire lum-ber product of the country came from the Pacific northwest. Today more than half of the Nation's supply of timber stands in these three states.

The Spokane country is said to have the largest growths of white pine left standing in the world. As con-veying some idea of the vastness of Mountains, it is estimated by wellmore timber left standing in this territory today than has been cut since

CCEUR D'ALENE, Ida. (Special of the good use to which former Correspondence)—During the year breweries may be put. 1924 business and industrial conditions throughout that part of the Inland Empire contained in northern Idaho, and especially in Kootenai County, of which Coeur d'Alene is the county seat, have been generally favorable and are continuing to improve with 1925 operations.

At present the six large lumber at Cœur d'Alene and other mills on the lake are running from one to three shifts, and report a fair amount of orders, with outlook for increasing business as the season advances. It is estimated that the output from mills located on Lake Cœur d'Alene or tributary streams in 1924 amounted to between 375,000,-000 and 400,000,000 feet, largely white pine, of which this section has the largest standing body in the United States, if not in the world.

The cut of all grades of lumber is increasing and while according to statistics the end may be in sight for big lumbering, there is still plenty of standing timber to insure many years

WENATCHEE RAIL PROJECT TO TIE WIDE TERRITORY

Will Provide New Outlets and Give Access to **Reclamation Areas**

WENATCHEE, Wash. (Special Correspondence)-Work has been actively resumed on the Wenatchee Southern Railway project, which will give north central Washington direct connection with all the railroads in the Pacific northwest, and tie with all the great reclamation and power developments now definitely under way throughout the central portion of the State, with the possibility of through rail service from Oroville, at the Canadian boundary, south to Kennewick near the Oregon line.

face of stout opposition, the Wenat-chee Southern obtained the approval of the Interstate Commerce Commis sion and the grant of a certificate of necessity. The showing of financial resources sufficient for the purpose, required by the federal commission is now being made. The right of way, already under option for the entire length of the proposed line, is now in cess of transfer.

Link With St. Paul Line The Wenatchee Southern will extend from Wenatchee along the west bank of the Columbia River, 53 miles, to a connection with the main line of the Chicago, Milwaukee & St. Paul at Beverly. By arrangements already assured, the St. Paul's ex-isting branch line of 47 miles from Beverly to Hanford would be used. A new line will be built from Hanford, 21 miles, to a connection with the Northern Pacific at Richland, which would lead to connection with the Union Pacific system at Kenne-wick, eight miles farther along. Only 74 miles of new construction are involved in the undertaking.

Great impetus has been given the Wenatchee Southern by the recent approval of the great Columbia River irrigation project by the engineers f the Federal Government; by federal power commission's authorization of the Priest Rapids power and industrial development, and by the attendant prospect of immediate work on the scarcely less extensive Horse Heaven reclamation project. These vast enterprises, just now left somewhat remote from one another city little more than two years ago. by the east-and-west transcontinen-tal rail lines, will be effectively linked by the north-and-south We-natchee Southern, which, for its en-It will give water-grade rail transportation to the whole of central Washington, to rail connections bank rail lines along the lower Columbia River, to the Pacific Ocean. Enlarging a Service

The third Wilson's Waffle Lunch will open on May 15 at the corner of Stevens Street and Sprague Avenue.

This will mark another step in the growth of one small waffle counter to three completely equipped restaurants serving only the best quality and variety of foods. Pleasing service in a homey, congenial atmosphere has made the thousands of satisfied patrons who are the "come back advertisements"

And so Wilson's Waffle Lunches will be prepared to serve more people with good meals.

Service, too, is the keynote of the prosperity of the Inland Empire. From the rich resources of the land the Empire workers are able to supply the world with many things necessary to its welfare. And in developing this service, the Inland Empire has grown from thousands to hundred thousands of happy people.

So service brings prosperity and prosperity enlarges service.

No. 3 (Open May 15)—Corner of Stevens Street and Sprague Avenue.

Spokane, Washington

Prosperity!

ROSPERITY has come to the happy, genial people of the Inland Empire. They have found prosperity in the rich natural resources of their land.

In more than one respect the Empire builders exercise good judgment. And not the least in choosing good shoes. Many of them wear Arnold Glove-Grip Shoes. Snug-fittingsmart-looking-restful-these shoes bring a new comfort and pleasure to walking.

We extend a welcome to visitors who come to the Inland Empire for pleasure or for business.

and the bounteous

Inland Empire

Pacific Northwest

Rest, relax and refresh yourself amidst an endless variety of scenic allurements in this land of virgin beauty.

The dashing Cascades of the Spokane River, generating 182,000 horsepower.

The world-famous Davenport Hotel, one of America's exceptional hostelries, the marvel of every tourist.

The alluring Rimrock and President Harding Drives; Rimrock Drive rivalling the Palisades of the Hudson in its beauty; Harding Drive featuring the route taken by President Harding through Spokane's finest residential

Mount Spokane, municipally owned. Thirty-five miles distant over splendid highways: from its top 17 silvery lakes can be seen.

Beautiful Spokane Valley, a valley of happy suburban communities, extending 34 miles east of Spokane to the city of Coeur d'Alene.

Seventy-six encircling lakes, all within a 50mile radius of Spokane and each with its alluring appeal.

Rugged mountains, limitless forests and fertile valleys, all within close distance of this modern city of over 100,000 people.

In the Land

Start at the start of things where unmatched natural resources and unlimited waterpower spell "Opportunity" for you.

The "Spokane Country" produces from 1-11 to 1-9 of the nation's wheat.

Here is the largest standing body of white

pine in the world. The second highest spillway dam in the

world is only forty miles from Spokane. There are 200 producing mines in this rich territory, including the largest lead mine in the world.

The value of Spokane manufactures is \$125,000,000 a year.

Spokane is the largest railroad center west of Omaha. A train arrives every 15 minutes of the day.

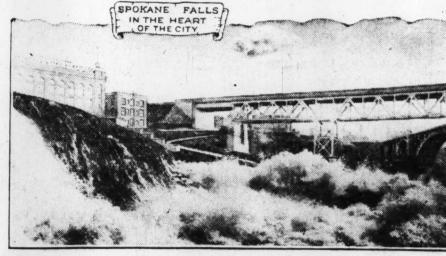

Spokane's postoffice receipts total more than \$1,000,000 a year.

The sunny, invigorating climate of Spokane and the Inland Empire makes life more enjoyable the year 'round.

SPOKANE CHAMBER OF COMMERCE Chamber of Commerce Building, Spokane, Washington

The Inland **Empire Produces** \$400,000,000 New Wealth Each Year

The extent and variety of its natural resources of mines, timber and agriculture are responsible for the statement that this is the richest area of its size in the whole United States.
